The map displays the urban layout of Forlì, Italy, with a focus on conflict areas identified by a red pixelated overlay. A thick blue line delineates the municipal boundaries. The map includes a network of roads, with communal roads shown as thin black lines and other roads as thin red lines. A railway line is depicted as a cyan line. Various building types are represented by grey shapes: residential buildings (solid grey), other buildings (hatched grey), schools (light purple), and hospitals (yellow). The red pixelated areas indicate zones of conflict, with a higher density of pixels suggesting more intense conflict. A legend in the top right corner provides a key for all symbols and colors used on the map. A north arrow and scale information (FORMATO A0 - Scala 1:5.000) are also present in the top right corner.

The map displays the urban area of Forlì, Italy, with a focus on conflict zones identified by the LNIGHT system. A prominent blue line delineates the municipal boundaries of the agglomeration. Overlaid on this is a complex network of red lines and shaded regions, representing areas of conflict or high noise levels. These red features are concentrated along major roads and in specific urban clusters. The background of the map is populated with small, grey rectangular shapes representing buildings, and a network of thin black lines indicating the road infrastructure. The overall layout shows a dense urban environment with significant areas of conflict, particularly in the central and eastern parts of the mapped area.
